New special assortments: Redheart beech for face applications

Superior Colour Redheart – if colour is wanted.

Redheart furniture is much in demand. At this year's IMM in Cologne nearly all manufacturers of furniture show pieces of red heart beech. Lately the same trend begins to show in flooring, too.

The problem:

You need redheart beech for face applications. Traditional timber is often characterised by a fairly small percentage of colour on the board and difficulties to calculate it in beforehand. In addition to that it is hard to recognise the redheart on freshly sawn boards.

Our solution:

At Pollmeier the timber is presanded and graded board by board. Because of this it is possible for us to offer you the following special assortments:

- **Superior Colour Redheart** – A top quality grade with at least 60% of redheart on the face. The perfect assortment for face applications with predominantly long working lengths.
- **Colour Redheart** – Economical quality with at least 60% of redheart on the face. Ideal for face applications with medium and short working lengths.
