

Pollmeier Product Innovations 03

Important information for Pollmeier customers

Pollmeier beech in 64 (60.5)mm now available ex-warehouse.

**64,0
(60,5)
mm**

0 50 [mm]

The problem

The cutting thickness 64 (60.5)mm was until now not one of our standard dimensions and was not produced regularly. This meant delivery bottlenecks in the past which caused you unusually long delivery times. We even had to turn away some of your orders.

The solution

We have reacted to the increased demand, especially in the grade Superior. Production capacity for the dimension 64 (60.5)mm has been significantly expanded in recent weeks. So in future we will be able to supply you regularly with this size in larger volumes ex-warehouse.

Qualities	Superior Superior 1 Face Cabinet
Lengths	from 1,85 m to 3,35 m
Thickness	64 (60,5)mm

More grades on request.
(ex-warehouse – subject to availability)
